

This is ACCNITE onDemand Your Investor Relations CRM in one place

Connect your proprietary data with our database, analyse and act upon comprehensive investor insights. Expand your investor base assisted by the AI powered investor targeting tool. Track your meeting schedules or organize no-broker roadshows yourself. Understand investor perception and make it easy for investors to provide feedback. Improve team collaboration and simplify board reporting – all in one integrated investor relations software.

Shareholder ID

Analyse the behaviour of your institutional investors on an ongoing basis using the extensive shareholder database and benefit from detailed investor profiles.

Investor Targeting with Artificial Intelligence

The engine's algorithms identify investors for you. Learn which accounts are most relevant based on scoring and portfolio metrics.

CRM for Investor Relations

Benefit from a variety of important features, that support you in building long-term relationships with the right investors.

Event Management

Digitally map your investor meetings or simply arrange your appointments directly using the integrated meeting management module.

Feedback

The fully digitized feedback process makes it easy for your investors to provide feedback and gives you a continuous overview of investor perceptions.

Reporting

Generate automated board reports on event level as well as on periodic reporting.

Build lasting investor relationships

Allow for efficient meeting preparation to make the most of your air time with investors. Connect your engagement history with our comprehensive data on assets under responsibility, portfolio KPIs, investment behaviour and investor potential.

Analytics

Keep track of your team's activities and measure their impact. Learn from your own work by connecting your proprietary data with shareholder activities.

With ACCNITE onDemand you will benefit from the ease of use and cost advantage allowing you to deploy your resources meaningfully and increase your team's productivity.
